Part 1

Clause 5, paragraph 3

Suggest rewriting the third from last sentence as follows:

“Approach C can be rapid and economical for the selection and dimensioning process but may lead to underestimation of the SPS or to a less economical solution due to over-design.”

Annex G, Clause 2

Suggest rewriting the last sentence of the first bullet as follows:

“The SDD for laboratory tests should be determined from the ESDD in service using the principles given in Annex F”.

Annex I

In the second paragraph, add a period after the word “reckoned”.

In the last paragraph, remove the comma after the words “uniformly conductive”

Part 2

Clause 1, NOTE

What is meant by “other organic materials”? Is this NOTE necessary?

Clause 6, second paragraph

Change to read “……for example, semi-conducting glaze and hydrophobic coatings.”

Clause 9.2, first sentence

Table 2 gives simple……

Clause 9.2, last sentence of second paragraph

“…..a less suitable profile….”

Table 2

The NOTES need to be re-numbered (1 is missing), and there is no reference in the Table to current NOTE 4
Part 3

Clause 1, NOTE

What is meant by “other organic materials”? Is this NOTE necessary?

Clause 6.1

First paragraph, last sentence: “……each base polymer has particular strengths and…..”

Silicone rubbers have good UV resistance, ozone resistance, surface hydrophobicity and hydrophobicity transfer capability…

Change the NOTE to read “Some polymer materials may collect more pollution…..”
